

Short and wide is not the answer! We listened to the experts when designing our Viper range of beginner/family boards – the vast network of windsurfing school organisations, with which Fanatic has long and engaging relationships. This provides us with great feedback to design boards that will both attract and keep beginners in our sport. These schools have immense experience with all types of beginners, their input directly influenced the Viper range - modern design concepts combined with proven experience. Long, stretched outlines and a finely-tuned CAD stretched power rocker line guarantee a long waterline. This is essential for maximum sub-planing performance and paves the way to first time planing experience. The perfect and equally balanced volume distribution makes Windsurfing fun and easy - from the very first step on the board. A daggerboard system vastly increases the sub planing performance, by offering additional stability and is the proven guarantee to staying upwind/coming back to the beach, critical for beginners and light wind cruising. Advanced windsurfers can also enjoy the Vipers as light wind freeride boards, with plenty of footstrap positions to choose from and an optional tuning kit to further boost performance.

To further increase the range of the Viper, Fanatic offers our exclusive tuning kit set:

With the help of our tuning kit, the Viper can be further performance tuned into a fun board, which can be used without a daggerboard. With this tuning kit, the daggerboard case can be closed on the bottom and on the deck of the board, whilst the daggerboard casing is filled with a specially made foam insert. With the closed daggerboard case and the 50cm Freeride GFK fin, the Viper can be converted within seconds into a lightwind freeride board, with a great performance potential! Content Tuning Kit: 1 Nylon bag, 1 Pvc foam insert, 1 Closing part bottom, 1 Closing part deck, 1 50cm Freeride GFK, 1 Quicklock fin screw XXL (70mm)

Sebastian with some features on the Viper:

- Straight outline shape concept for better upwind and rig steering
- Max. sub planing performance due to outline/volume combination
- Fully removable daggerboard - essential for beginners, far bigger wind range, extra stability
- Softdeck covers the whole deck area for higher surface durability
- Great allround performance for freeride sailing

Only the best fittings are supplied with the Viper, Viper fin 34, a daggerboard, Fanatic pro footstraps and the EVA softdeck over the whole surface.

High Resistance Skin:

High resistance composite technology, which offers an optimum weight and durable construction for everyday usage. A thicker durable outer skin gives the board hull a high strength, ding and impact resistance. Strategic use of glass reinforcements ensures an adequate stiffness.

Boardname	Vol. (l)	Length (cm)	Width (cm)	Weight* (kg)	Technology	Fittings
Viper 75	160	275	75	TBA	High Resistance Skin-Soft Deck	Fanatic Viper Fin 34, Power Box, 4 Fanatic Pro Velcro Footstraps, Daggerboard, Sailsize: 2.0 – 10.0m ²
Viper 80	190	280	80	TBA	High Resistance Skin-Soft Deck	Fanatic Viper Fin 34, Power Box, 4 Fanatic Pro Velcro Footstraps, Daggerboard, Sailsize: 2.0 – 10.0m ²
Viper 85	220	285	85	TBA	High Resistance Skin-Soft Deck	Fanatic Viper Fin 34, Power Box, 4 Fanatic Pro Velcro Footstraps, Daggerboard, Sailsize: 2.0 – 10.0m ²

*Weight tolerances of +/- 6% are possible!

RIDER: ZOE SCOTT & DANIELLE KIERSZ

FANATIC

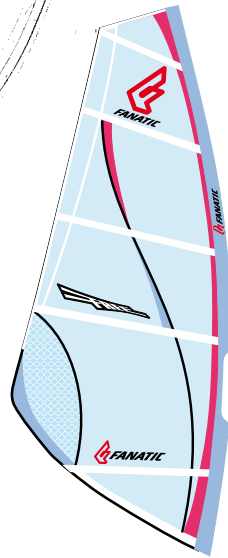

FANATIC VIPER DAGGERBOARD BOX

SOFTDECK COVERS THE WHOLE DECK AREA

TUNING KIT

The Fanatic Free rig is perfect for all Windsurfers who want to keep it simple with two decisive arguments: firstly the "one mast fits all" concept and secondly a very competitive price. No confusion over high tech or over-engineering, these sails are all about fun and freedom!

BOARD	VOL.	LENGTH	WIDTH	WEIGHT	TECHNOLOGY	FITTINGS
Viper 75	160	275	75	TBA*	HIGH RESISTANCE SKIN SOFTDECK	Fanatic Viper Fin 34, Power Box, Daggerboard, SAILSIZ: 2.0-10.0 M ²
Viper 80	190	280	80	TBA*	HIGH RESISTANCE SKIN SOFTDECK	Fanatic Viper Fin 34, Power Box, Daggerboard, SAILSIZ: 2.0-10.0 M ²
Viper 85	220	285	85	TBA*	HIGH RESISTANCE SKIN SOFTDECK	Fanatic Viper Fin 34, Power Box, Daggerboard, SAILSIZ: 2.0-10.0 M ²
